# How to Rate a Podcast on Spotify

Unlike Apple Podcasts, Spotify:
- will let you rate, but not review, a podcast
- only lets you do so in the mobile app
- requires users to follow, and listen to at least some of the podcast, before rating it.

Navigate to the podcast's page. Beneath the name and artwork, you'll see options to follow, get notified, settings, and a vertical line of three dots.

Click on the three dots, which opens a sub-menu. This gives you options to follow, rate, or share the show. "Rate Show" has a star next to it.

If you don't already follow the show or haven't listened, the interface cheerfully encourages you to listen to a few episodes before rating it.
